Share of life insurance in incremental household financial saving

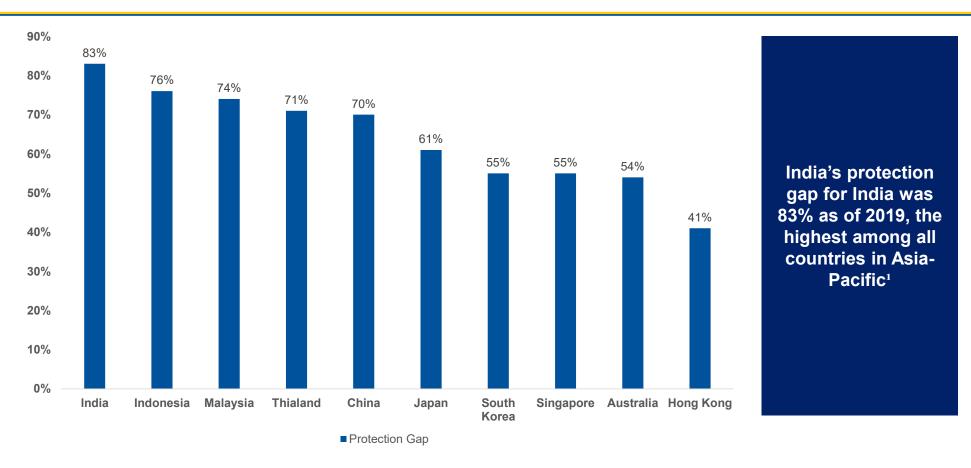

Households are more inclined towards saving and purchasing in long term products, which will likely to increase demand for life insurance in India.

Source: Ministry of Statistics and Programme Implementation (MOSPI)

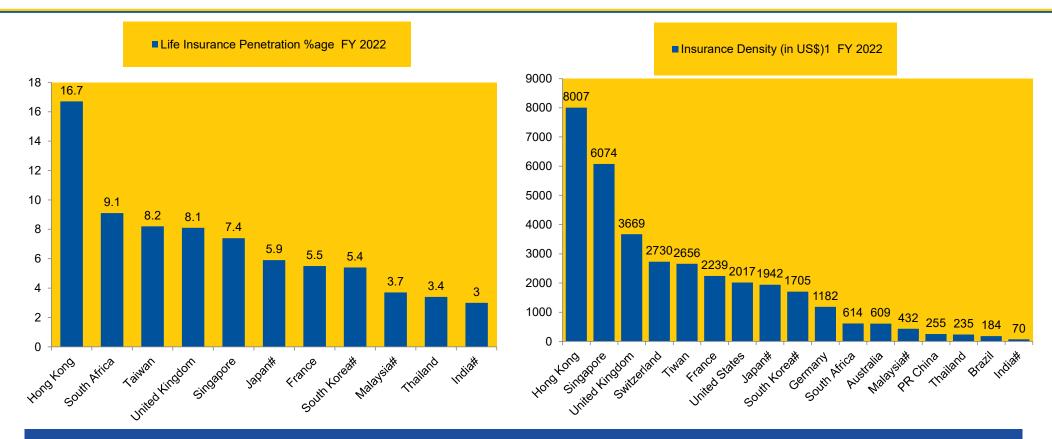

Protection gap for different countries

Low life insurance penetration and insurance density² in India

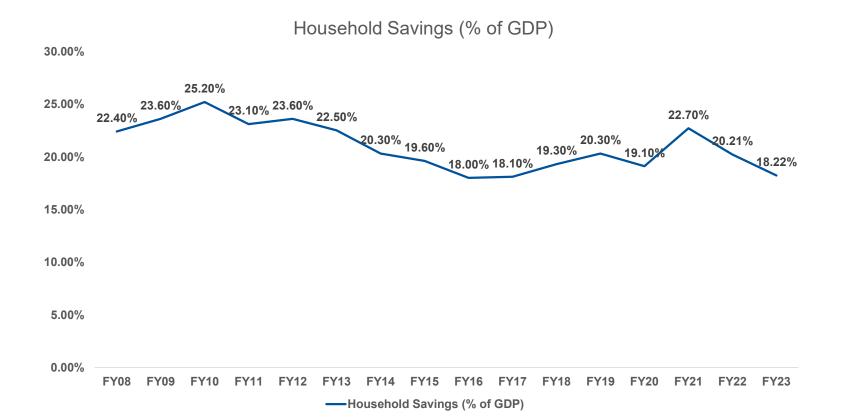

WELL POSITIONED TO RIDE THE GROWTH IN A HIGHLY UNDERINSURED MARKET BOTH IN TERMS OF
PENETRATION AND DENSITY

Household savings to increase

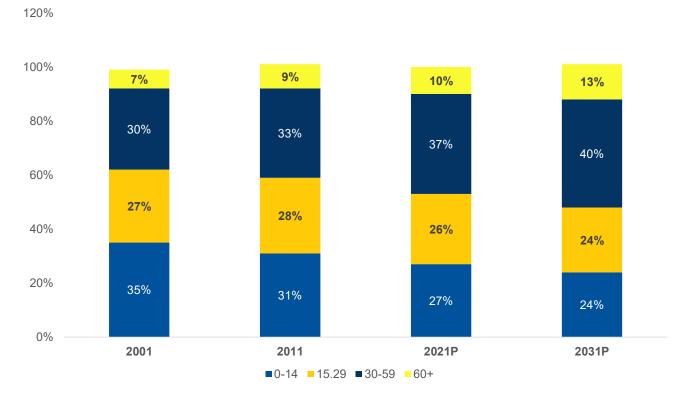

Household saving as percentage of GDP is 18.22% in fiscal year 2023

66

Increasing insurable population to fuel industry growth

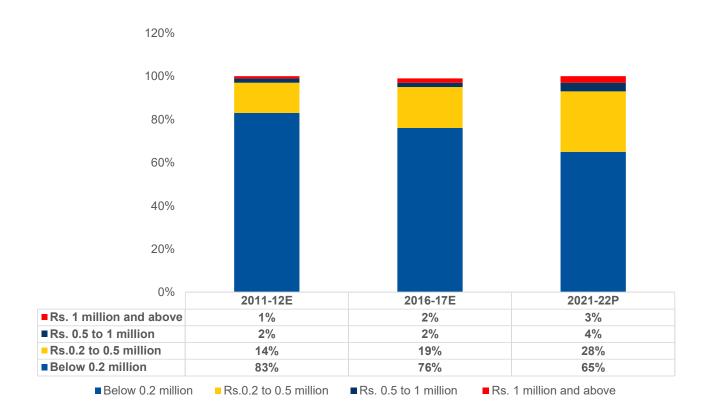

For 2021, India has largest share of young population in the world, with a medium age of 28 Years. About 90% of Indians will still be below the age of 60 years.¹

Income demographics

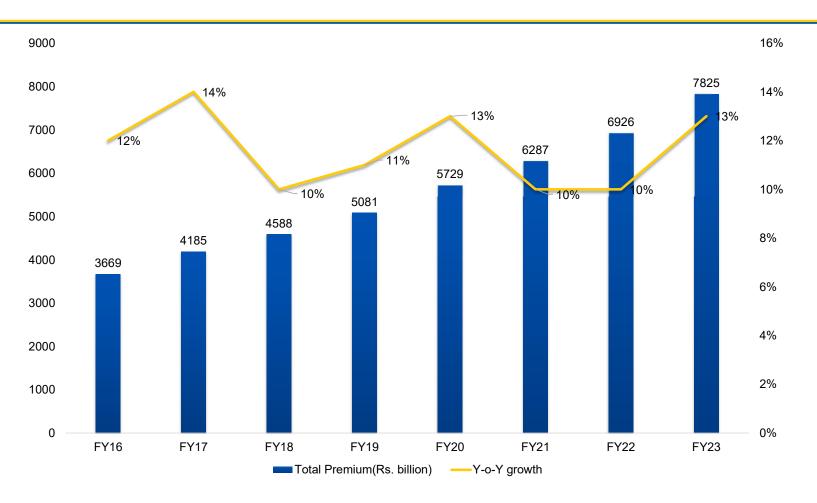

Rising Income level to make insurance products more affordable.

Strong growth in total premium for life insurance industry

Total premium has grown in the range of 10% to 14% in last eight years. Amongst the different player groups, LIC, which holds the maximum 58.87% (FY24) share in total life insurance premium.
